------------------------	---

0.1 | rivtbk Example

A rivtbk is a collection of rivt files with a common subject and organized for selective addition to rivt docs and reports. A rivtbk may be published as a PDF or text report to facilitate review and selection of chapters.

rivtbks do not need to be organized into divisions. A sequence of chapters is sufficient as chapters will be renumbered in the target report. The folder structure for rivtbks facilitates copy-paste of chapters.

The rivt file and its source files are contained within the same folder (orange). A rivtbk chapter can be imported into a rivt report by copying the *rivt file* (blue) to the *rivt-report* folder and its source folders (green) to the *rvsrc* folder.
