0.1-1 | Introduction

A rivtbk is a collection of rivt files with common subject matter that may be published as a PDF or text report. The files are organized under a root folder rivtbk- with a name that identifies the subject matter. Each rivt doc is contained within a chapter folder that includes the rivt file its associated sources. This facilitates extracting single docs or merging a chapter into a rivt report.

A rivtbk chapter may be copied to a rivt report by:

- 1. merging the data, image and scripts folders into the /rvsrc folder
- 2. copying the rivt file to the /rivt-report folder.
